

Power Distribution

Battery Pack(18650 Lithium-ion Cells)

18650 cells(3.7 V each)
Configuration to be finalized
(2S ~ 7.4 V nominal)

Battery Power (7.4 -8.4)

DC Jack Adapter
1-24 Volt Power Supply, 2.1 x 5.5 mm Connectors

Arduino UNO R4 WIFI

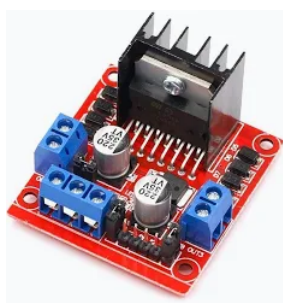

power through DC barrel jack
Board input path supports 6-24V

5 V regulated output

HC-SR04 Ultrasonic Sensor

5 V DC Supply
Low current

L298N Motor Driver

Motor Power (3-6 V)

Motor Power (3-6 V)

Left & Right DC motor

3-6 V

Power Notes

Use common ground between Arduino, L298N, and Sensor
Arduino is powered through the DC barrel jack, not the VIN header pin
HC-SR04 requires 5V
TT motors are approximately 3-6 V motors
Battery configuration must match motor requirments (2 cell)
